

Basic Introduction to

Simon Knüsel

Forest Dynamics, WSL

simon.knuesel@wsl.ch

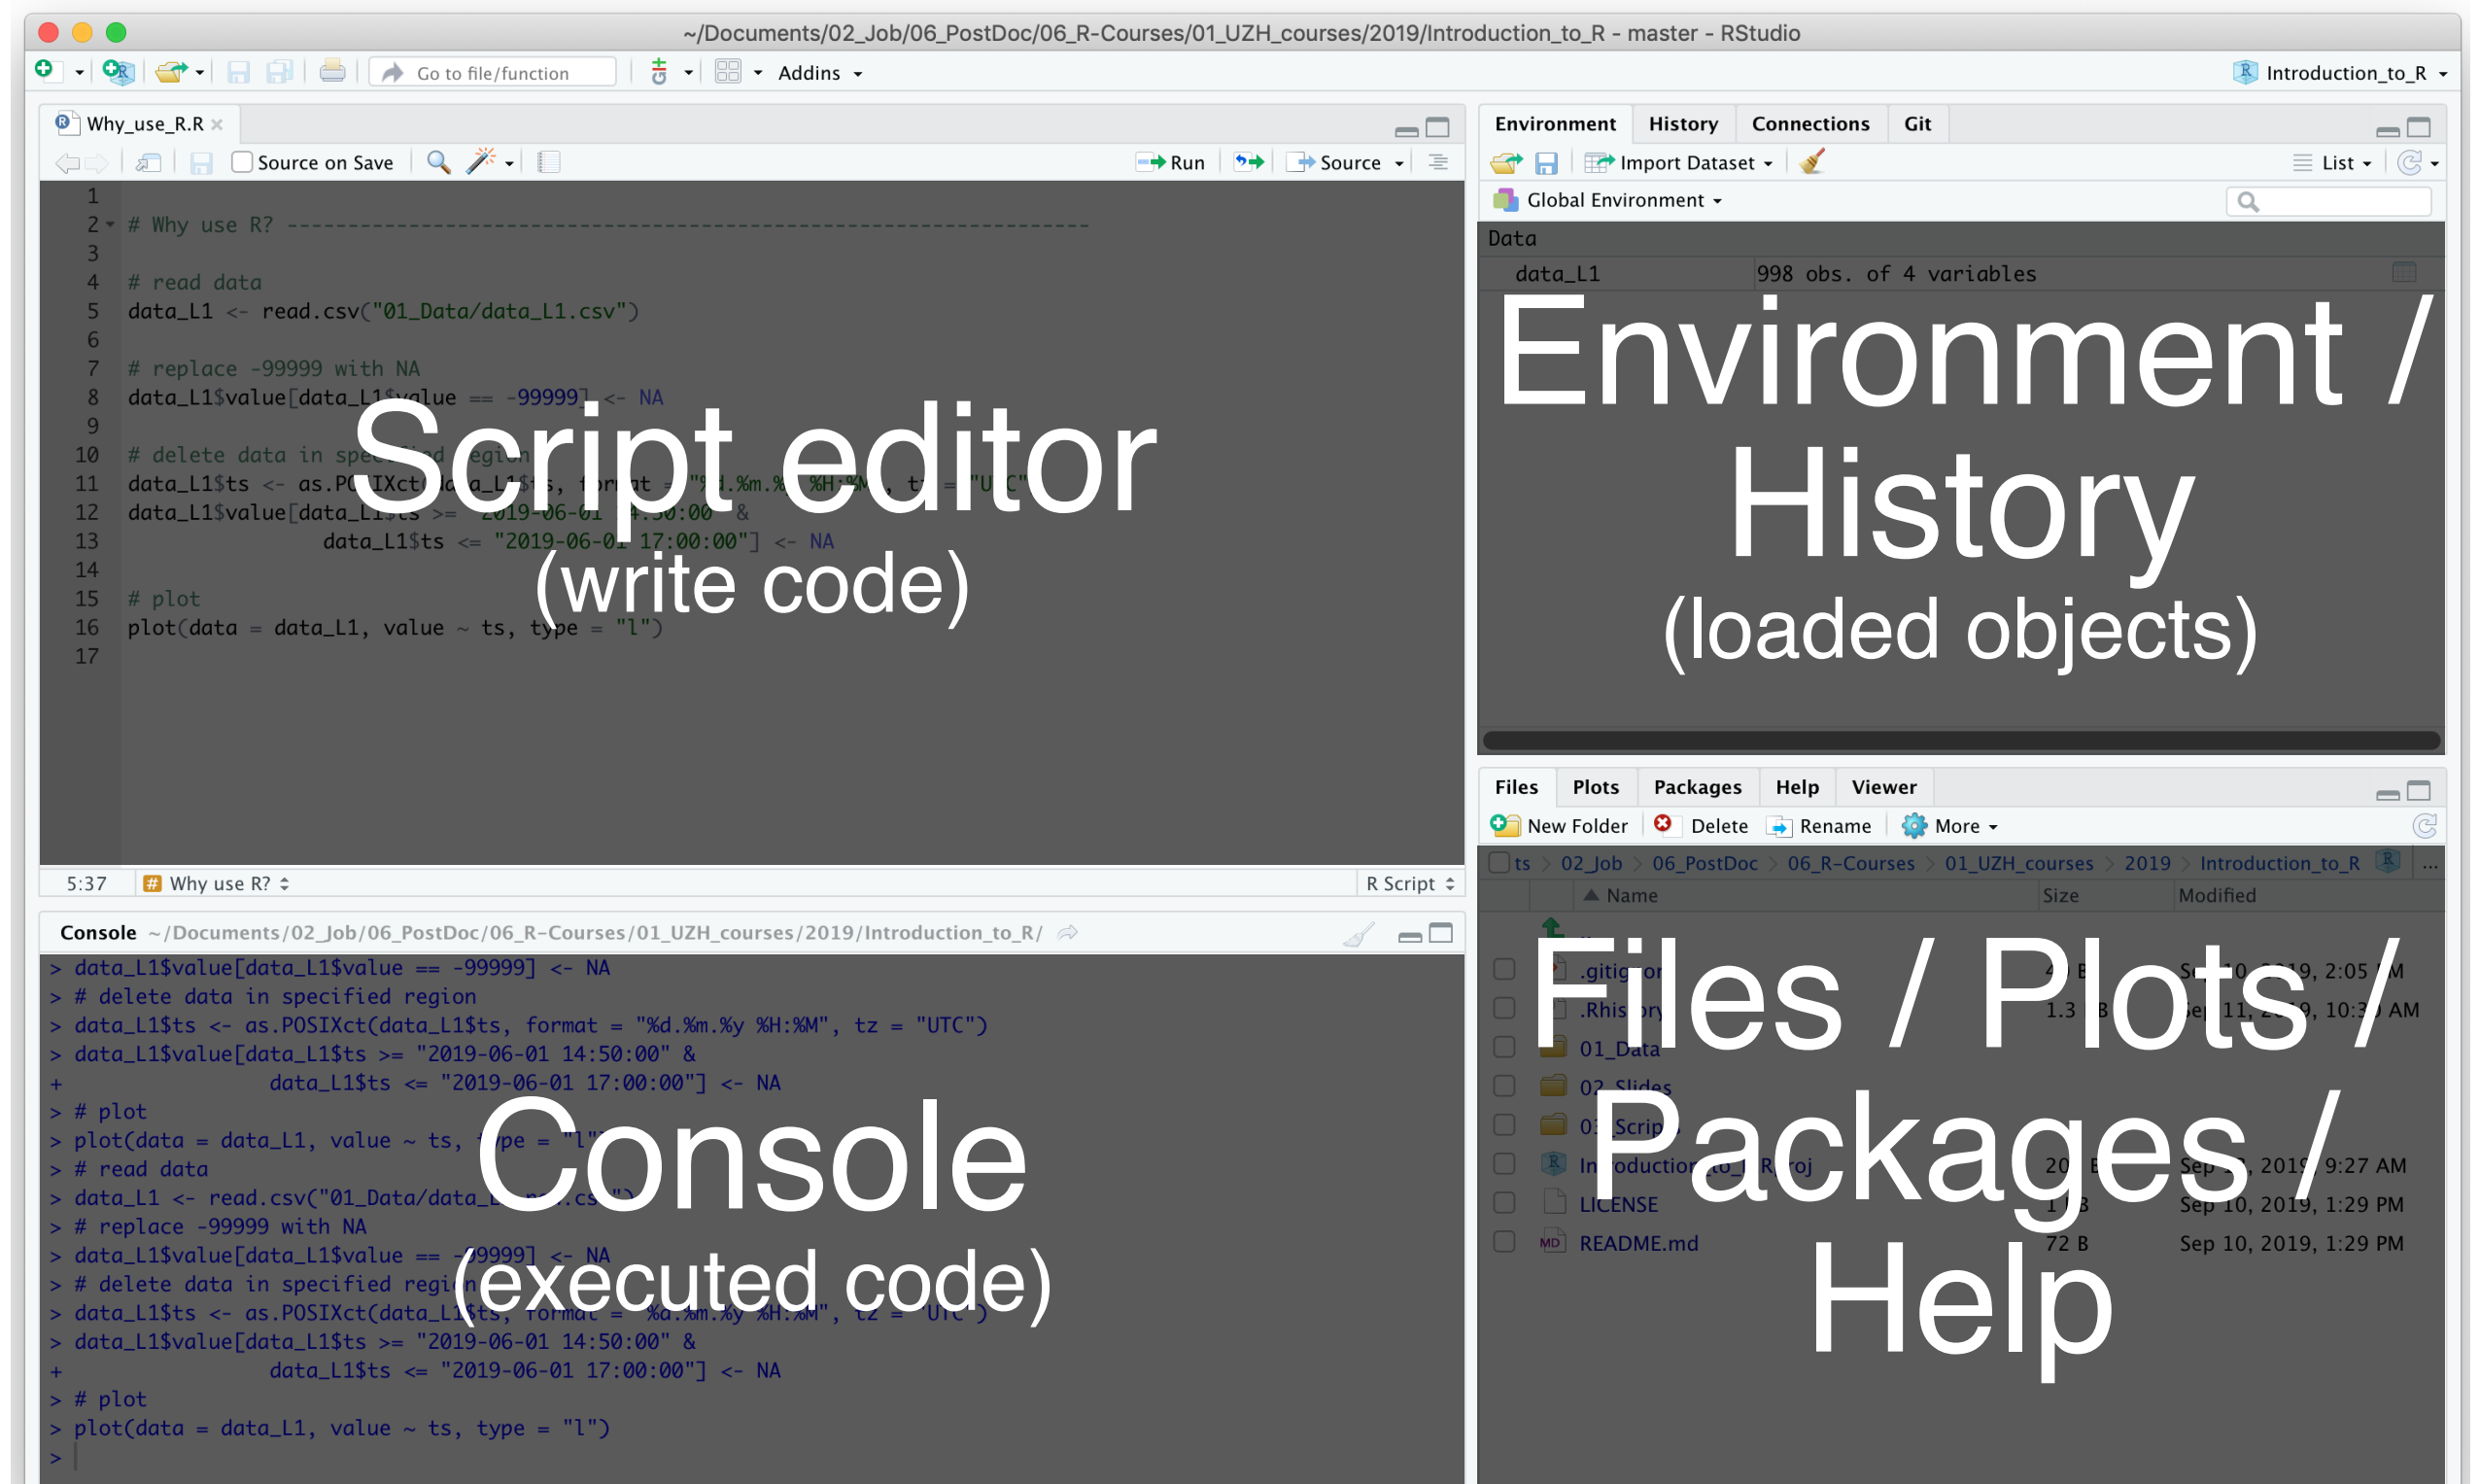

Goals

- Start to code
- Learn how to use R for the analysis of your data
- Know where and how to get help if you are stuck

Why use R?

- Reproducibility
- Keep original data untouched
- It is open source... with a large community
- Advanced statistics
- State-of-the-art graphics
- Powerful data manipulation
- Supports large datasets
- Fast computation
- Easier automation
- Anyone can contribute
- ...

RStudio

The screenshot displays the RStudio application window. The top toolbar includes icons for file operations and a 'Go to file/function' search bar. The main interface is divided into four panels:

- Script editor (write code):** The top-left panel shows an R script file named 'Why_use_R.R'. The code includes comments and commands for reading a CSV file, replacing values, deleting data, and plotting.
- Environment / History (loaded objects):** The top-right panel shows the 'Global Environment' with a search bar and a list of objects. The 'Data' tab is active, showing 'data_L1' with 998 observations of 4 variables.
- Console (executed code):** The bottom-left panel shows the output of the executed code, including the same commands as the script editor.
- Files / Plots / Packages / Help / Viewer:** The bottom-right panel shows a file explorer view of the project directory, listing files like '.gitignore', '.Rhistory', '01_Data', '02_Slides', '03_Script', 'Introduction_to_R.Rproj', 'LICENSE', and 'README.md'.

Functions

```
function_name(first argument, second argument, ...)
```

Example:

```
vec <- c(3, 6, 7, 4.2, NA, 6, 8)
```

```
mean(x = vec, na.rm = TRUE)
```

Help on functions:

```
?mean (?function_name)
```

Data structures

Vector

Elements separated by a comma

```
vec <- c(3, 6, 7, 4.2, 6, 8)
```

Data frame

Table with rows and columns

Species	Length (cm)	Height (cm)	Weight (kg)
Lynx lynx	112	65	22.5
Canis lupus	145	78	34

Indexing of vectors

```
vec <- c(3, 6, 7, 4.2, 6, 8)
```

```
# select the first element of the vector
```

```
> vec[1]
```

```
3
```

Indexing of vectors

```
vec <- c(3, 6, 7, 4.2, 6, 8)
```

```
# select the first element of the vector
```

```
> vec[1]
```

```
3
```

```
# select elements 1 to 3
```

```
vec[1:3]
```

```
3 6 7
```

Indexing of data frames

```
df <- airquality  
view(df)
```

```
# select first row
```

```
df[1, ]
```

```
# select third column
```

```
df[, 3]
```

```
df[row, column]
```

	Ozone	Solar.R	Wind	Temp	Month	Day
1	41	190	7.4	67	5	1
2	36	118	8.0	72	5	2
3	12	149	12.6	74	5	3
4	18	313	11.5	62	5	4
5	NA	NA	14.3	56	5	5
6	28	NA	14.9	66	5	6
7	23	299	8.6	65	5	7
8	19	99	13.8	59	5	8
9	8	19	20.1	61	5	9
10	NA	194	8.6	69	5	10
11	7	NA	6.9	74	5	11
12	16	256	9.7	69	5	12
13	11	290	9.2	66	5	13
14	14	274	10.9	68	5	14
15	18	65	13.2	58	5	15
16	14	334	11.5	64	5	16
17	34	307	12.0	66	5	17
18	6	78	18.4	57	5	18

Indexing of data frames

select custom range

```
df[c(3:5, 7), 3:4]
```

	Ozone	Solar.R	Wind	Temp	Month	Day
1	41	190	7.4	67	5	1
2	36	118	8.0	72	5	2
3	12	149	12.6	74	5	3
4	18	313	11.5	62	5	4
5	NA	NA	14.3	56	5	5
6	28	NA	14.9	66	5	6
7	23	299	8.6	65	5	7
8	19	99	13.8	59	5	8
9	8	19	20.1	61	5	9
10	NA	194	8.6	69	5	10
11	7	NA	6.9	74	5	11
12	16	256	9.7	69	5	12
13	11	290	9.2	66	5	13
14	14	274	10.9	68	5	14
15	18	65	13.2	58	5	15
16	14	334	11.5	64	5	16
17	34	307	12.0	66	5	17
18	6	78	18.4	57	5	18

Shortcuts

	Mac	Windows / Linux
Run line	Cmd + Enter	Ctrl + Enter
# (Comment line)	Alt + 3	#
%>% (Pipe sign, used in dplyr package)	Cmd + Shift + M	Ctrl + Shift + M
Show keyboard shortcuts	Alt + Shift + K	Option + Shift + K

Capabilities of R

- Nice graphs
https://www.r-graph-gallery.com/violin_and_boxplot_ggplot2.html
- Maps with R
<https://www.r-graph-gallery.com/choropleth-map.html>
- Interactive web applications (R Shiny)
<https://shiny.rstudio.com/gallery/movie-explorer.html>
- R and databases
<https://db.rstudio.com/getting-started/connect-to-database>

Where to get help

- Websites
 - RStudio Cheat Sheets
<https://www.rstudio.com/resources/cheatsheets/>
 - Google
e.g. „r how to merge two data frames“
 - <https://stackoverflow.com/>
 - <https://www.r-bloggers.com/>
- Online book
 - R for Data Science
<https://r4ds.had.co.nz/>

...more help

- Other R courses
 - R: tidyverse for data science (UZH)
<https://app.connect.uzh.ch/apps/id/kurse.nsf/veranstaltungen.xsp>
 - Specialised R-Workshops (2 days, 1ECTS for PhD students, Plant Science Center)
<https://www.plantsciences.uzh.ch/en/teaching/phdplantscience/coursecatalogue.html>
 - Zurich R Courses
<https://www.zhrcourses.uzh.ch/en.html>
 - Specialised R-Workshops (1 day intensive course, small groups)
<https://ethz.ch/services/de/it-services/katalog/support-weiterbildung/it-training/kurse.html>

Sources

For the development of this course I was mainly inspired by the course material of Jan Wunders *R* course

Introduction to R (Wunder, 2016)
